

## K/1 - August 20th-24th

Here's a quick peek at the upcoming week...

### Math

In whole-group math we will be working on building number sense by counting, recognizing, identifying, comparing, and writing numbers 0 – 10 using correct formation. We will work on comparing numbers and identifying one more and one less.

We will also begin guided math this week which will give me the opportunity to assess and meet your child's individual needs. I will meet with small groups while others rotate to math stations to practice various math skills.

### Literacy

What does it mean to be respectful? Why is important to treat others respectfully? This week's focus is all about respect. We will be reading and discussing Chester's Way by Kevin Henkes. We will compare and contrast characters within the story. We will also be learning to identify who is telling the story at various points in the text.

### Growth Mindset

Sometimes children will say that they "can't" do something or that it is "too hard." We will be learning about growth mindset throughout the school year. A growth mindset is the intrinsic thought within that tells you that you are not quite done yet and that you are forever growing, changing, and making progress. My goal is to help give your child new verbiage, a new mindset, and a toolbox to pull from when they encounter a problem.
